

## Creating a display board

Now that your pupils have finished their research, it is time to for them to prepare their display board for the science fair! Stress to your pupils the important of making the display board attractive. They may be an expert in their chosen topic but if they don't make their display board attractive then people may not be interested in their work!

Tip: When you read a science display board you usually start at the top left and read down each column...

Below is an example of a display board at a primary school science fair,. You can use this format help your students create their display boards. The shaded labels are part of the scientific method used throughout the project, pupils can use these as titles for each section of their poster.

## Display board examples

The display board does not have to be all singing and dancing, the idea is to get pupils excited and enthusiastic about doing STEM research. Here are some examples of display boards that have been produced in the past...
