11 April 2025

Dear Parents/Carers

I am delighted to announce that we will be having our very own St Laurence STEM (Science, Technology, Engineering and Maths) Week from **Monday 16th – 19th June**.

There will be fun activities all week based on this year's theme of '**Changes and Adaptations**'. This could be about; humans, evolution, animals, technology, towns and cities.....the possibilities are endless! Most importantly we will be having our very own Science Fair!

The Science Fair will take place on Wednesday 18th June. This will be an opportunity for children to create and present their own projects.

On our [Science Page](#), I have included some websites, ideas, tips and tricks on how to use the Scientific Method to organise a science experiment and how it needs to look for presentation at the Science Fair.

These links highlight [investigation ideas](#), [organisation](#) and [display ideas](#) for the children and yourselves on how to create a science project that children can bring in for the science fair and talk about. Children can do this individually, in pairs or in groups, hopefully with your support, to create a project using the theme of **Changes and Adaptations**.

Parents and Carers will be invited to the Science Fair (Wednesday 18th June) to see the children's work from 2:30pm onwards. Children will need to bring in their projects on the morning of the Science Fair.

I would like to thank you in advance for your support and hope you can join us.

Yours sincerely

Ms Meera Parmar
Science Lead
